----- **End of commodity list** -----

This permit is granted subject to the requirement that fees determined under section 592(1) are paid.

Daniel Connor
 Delegate of the Director of Biosecurity Date: 01 October 2020

Important information about this permit and the import of goods

Note: This permit covers Department of Agriculture, Water and the Environment biosecurity requirements. It is your responsibility to ensure all legal requirements relating to the goods described in this import permit are met. While you should rely on your own inquiries, the following information is provided to assist you in meeting your legal obligations in relation to the importation of the goods described in this import permit.

Authority to import

You are authorised to import the goods described in this import permit under the listed conditions.

Compliance with permit conditions and freedom from contamination

All imports may be subject to biosecurity inspection on arrival to determine compliance with the listed permit conditions and freedom from contamination. Imports not in compliance or not appropriately identified or packaged and labelled in accordance with the import conditions they represent may be subject to treatment, export or destruction at the importer's expense, or forfeited to the Commonwealth.

Compliance with other regulatory provisions

Additionally, all foods imported into Australia must comply with the provisions of the *Imported Food Control Act 1992*, and may be inspected and/or analysed against the requirements of the Australia New Zealand Food Standards Code.

All imports containing or derived from genetically modified material must comply with the *Gene Technology Act 2000*.

It is the importer's responsibility to identify and ensure they have complied with all requirements of any other regulatory organisations and advisory bodies prior to and after importation. Organisations include the Department of Home Affairs, the Department of Health, Therapeutic Goods Administration, Australian Pesticides and Veterinary Medicines Authority, Food Standards Australia New Zealand and any state agencies such as Departments of Agriculture and Health and Environmental Protection authorities. Importers should note that this list is not exhaustive.

Change of import conditions

Import conditions are subject to change at the discretion of the Director of Biosecurity. This permit may be suspended or revoked without notice.

Notification of import

Notification of the import must be provided to the Department of Agriculture, Water and the Environment for all imported goods other than goods imported as accompanied baggage or goods imported via the mail and not prescribed under *the Customs Act 1901*. Notification must be consistent with the Biosecurity Regulation 2016.

Valid import permit

The importer must hold a valid import permit at the time when the goods are brought or imported into Australian Territory.

The importer must verify that they hold a valid import permit in relation to the consignment by providing positive identification to the Department of Agriculture, Water and the Environment, by either:

- i. Submitting (or providing) the permit for biosecurity clearance.

OR

- ii. Providing any physical, digital or verbal information that allows the permit to be identified at the time of biosecurity clearance.

Provision of required documentation

All required documentation must accompany each consignment. Alternatively, necessary documentation will need to be presented to the Department of Agriculture, Water and the Environment at the time of clearance. In order to facilitate clearance, airfreight or mail shipments should have all documentation securely attached to the outside of the package, and clearly marked "Attention Department of Agriculture, Water and the Environment". Documentation may include the import permit (or import permit number), government certification and invoice.

If the product description on the import permit varies from the identifying documentation provided for clearance, the importer is responsible for providing evidence to the biosecurity officer that the import permit covers the goods in the consignment.

Any documentation provided must comply with the Department of Agriculture, Water and the Environment's minimum documentation requirements policy.

Permit conditions

It is the importer's responsibility to ensure that the following permit conditions are met in relation to each consignment. Where more than one set of permit conditions is shown for a good please read each set of conditions to determine which applies to a specific consignment.

1. Unscoured wool from New Zealand

This section contains permit conditions for the following commodity (or commodities):

1.	Goods containing biological material Product Description: UNSCURED WOOL SAMPLES
----	--

1.1. Biosecurity Pathway

- a. These conditions allow for the import of unscoured wool sourced from animals resident in New Zealand at the time of collection.
To demonstrate compliance with this requirement you must present the following on an Official government certificate:
A statement that the wool is sourced from New Zealand only.
- b. The importer or the person in charge of the consignment is required to nominate one of the following procedures:
 1. Full unpack inspection of the consignment for contamination with insects, seeds and faeces.
 - 1.1. An inspection of at least 5% of the consignment is required. Consignments must be imported in a manner that facilitates inspection or the importer, or person in charge of the consignment, must nominate an approved arrangement site (AA site) with suitable equipment to allow the consignment to be inspected (e.g. if consignments are imported in tri-packed bales, importers must nominate an AA site with equipment suitable for opening these bales).
 - 1.2. Contamination with insects:
If insects are present, the consignment must be directed for methyl bromide fumigation or phosphine fumigation.
 - 1.3. Contamination with seeds:
If seeds are found (there is a zero tolerance) the consignment will be held pending identification of these seeds. If the seeds are identified as non-permitted seeds, the consignment is subject to scouring at an approved arrangements site. The consignment must be scoured by one of the approved methods listed on this permit.
 - 1.4. Contamination with faeces and/or faecal material:
If faecal contamination is detected, the consignment is subject to scouring at an approved arrangements site. The consignment by be scoured by one of the approved methods listed on this permit.
 - 1.5. If the inspection does not detect non-permitted seeds or faecal contamination, the consignment may be released from biosecurity control.

OR

2. Upon arrival into Australian territory the product must be directed to a class 3.0 approved arrangement site (AA site) for scouring by one of the approved methods listed on this permit. Following scouring the wool may be released from biosecurity control.
- c. **Approved Scouring Methods**
1. Scouring at a minimum temperature of 60°C for at least 5 minutes, or
 2. Scouring at a minimum temperature of 70°C for at least 3 minutes.
- d. **Waste disposal**
- Waste may be disposed of as general waste via municipal waste disposal systems.
Waste must not be used, or disposed of, on agricultural land.
Waste must not be allowed to drain into waterways.
- Note: These conditions apply to all waste from the imported goods before and after the scouring process.
- e. This import permit prohibits the goods to be distributed, sold or used for veterinary or agricultural purposes including stock feed, animal cosmetic manufacture, veterinary therapeutic or vaccine manufacture or environmental use associated with livestock unless approved by the Department of Agriculture, Water and the Environment in writing for specific alternative uses.
- f. This import permit prohibits the goods to be distributed, sold or used for aquaculture, fisheries or for bait purposes.
- g. **Commercial administrative conditions**
Documents must be provided with each consignment which:
1. identify the consignment (if non-personal) e.g. entry number
 2. identify all goods being imported as part of this consignment e.g. invoice or waybill or importer's manifest
 3. describe the goods being imported (where not clear).
e.g. 1: Product XRab = Purified protein derived from rabbits
e.g. 2: Product AX = Synthetic antibiotic
e.g. 3: Comte = Cheese.
- h. Under the [Biosecurity Charges Imposition \(General\) Regulation 2016](#) and Chapter 9, Part 2 of the [Biosecurity Regulation 2016](#), fees are payable to the Department of Agriculture, Water and the Environment for all services. Detail on how the department applies fees and levies may be found in the [Charging guidelines](#).
- i. In addition to the conditions for the goods being imported, non-commodity concerns must be assessed including container cleanliness, packaging and destination concerns, and may be subject to inspection and treatment on arrival. Please refer to the Non-Commodity Cargo Clearance BICON case for further information.
